Q: Google fonts via a custom css I am not sure how to add google font specifically. I followed the instructions here and also on Google but nothing works. It doesn't even show up on the comp. It's something to do with the custom css. Here is my code: HTML Hello World Custom.css @import url(""); @font-face { font-family: 'Lato'; font-weight: 300; font-style: normal; src: url("../fonts/lato-regular-webfont.woff") format("woff"); } @font-face { font-family: 'Lato'; font-weight: 400; font-style: normal; src: url("../fonts/lato-regular-webfont.woff") format("woff"); } @font-face { font-family: 'Lato'; font-weight: 700; font-style: normal; src: url("../fonts/lato-semibold-webfont.woff") format("woff"); } @font-face { font-family: 'Lato'; src: url("../fonts/lato-bold-webfont.woff") format("woff"); } .signup form { font-family: "Lato", sans-serif; } When I add "Lato" before form it seems to work but how can I get the font working specifically for those links? It seems to work for every site but not specifically for the form. A: Are you trying to use the google fonts but only for your contact.css file? For example... @import url(https
