## Asymetrix 3dfx 2.0 Free Download

I, "Cedge", used Asymetrix 3D rendering software from 3dfx 1.0 to Web3d 2.0 and was in a state of unforgivable ignorance. I believe that when I used something like Web3d 2.0 to render a 3D object, I needed to use the 3dfx program to render a 2D image. I also felt that all I had to do was set the resolution before I used Web3d 2.0, or just used at least 300 DPI up to that point. What I would like to do is just take an image and load it into Web3d 2.0 using the "ImportImage" function.
