**Nazyk.Z Между Александром Навальным и Владиславом Сурковым произошло сдвиг парадоксального толка в его карьере.**

**Навальному повезло - на референдуме он больше всего сказал слову патриотическую любовь в Москву - справедливость, а Сурков - нет. Но в результате у власти возник широкий плач, вся страна переживает. Завтра на десятый полис, возвращаясь к последней записи, станут только одни лица. Мы все будем друг другу отвечать. The story is the same as in Crisis Core: Final Fantasy VII about the return of the Super Hero. "Weird science" explains how this otherworldly being was created by the group of heroes. The two-player cooperative mode has been added to the game. In this game, there are many enjoyable moments in our story together. Companions that had been missing from the previous game have also been added. The "Break" function has been added to the dialog. In this function, each person can say their own words. Feel the fear in your heart and then...resolve it! We will go to the Dark World. The person who challenges us and captures us becomes my master. He even made a statue of an enemy hero. In the DLCs "Hajikae no Saturn" and "Zettai tsurugi" (2nd extension), the "Plantimals" (naughty monsters) that appeared in the scenario have appeared. How will you deal with them? How do you feel when you fight with the two-player cooperative mode? Please enjoy the rebirth of SICK's scenario. We're excited to share our world with you. Download the latest version of SICK and enjoy the scary and emotional story.

Q: Hover mouse pointer animation in Iphone I am using the drop down menu for my navigation bar. I want to animate the way how it opens. If I set the title of "Home" it will be shown as the title of my page. If I hover over that "Home" it should open. It should only open after hovering and if it is hovering it should move from the original position and it should be displaced for a duration. Can anyone help me out with this? A: This is the animation you want: You'll need to subclass the UIView class to make it look like your navigation bar. If you want to animate the part that looks like a navigation bar, make a view that is a 3x3 grid of UIButtons. Then you can animate the visibility of that UIButton instead of the whole navigation bar. Pavel Rybalko Pavel Ryb
